The castle's saltwater moat is connected to the Seto Inland Sea by a sluice gate, and the water level rises and falls with the tide. Visitors can try feeding sea bream (tai) in the inner moat, as well as take a castle boat tour in the Japanese-style boat "Tamamomaru" (from March to November). Visitors can also take in a view of the Seto Inland Sea from the main tower's observation deck, while enjoying a cool sea breeze.
